

ANDROID AUDITOR: SECURITY REPORT

Enterprise Grade Binary Forensics | 2026-10-07 16:21

Target Application: Domino's Pizza - Food Delivery
Package Name: com.Dominos

1. Security Analysis Overview

RISK SCORE: 7
VERDICT: Suspicious
TOP FINDINGS: No high-risk permissions, Secrets=121, Exported=19.

2. Detailed Findings & Remediation Guide

Component / Vulnerability	Contextual Risk Analysis	OWASP Cat.	Remediation Guide
Permissions	Domino's Pizza - Food Delivery categorized as General. Permissions seem standard for this type.	Info	No immediate action.
Hardcoded Secret	Found Sensitive Keyword: ()Landroidx/compose/...	M2: Insecure Data Storage	Use Secrets Manager or Android Keystore.
Hardcoded Secret	Found Sensitive Keyword: , isPassword=...	M2: Insecure Data Storage	Use Secrets Manager or Android Keystore.
Hardcoded Secret	Found Sensitive Keyword: ; password:...	M2: Insecure Data Storage	Use Secrets Manager or Android Keystore.
Hardcoded Secret	Found Sensitive Keyword: Failed to fetch show...	M2: Insecure Data Storage	Use Secrets Manager or Android Keystore.
Hardcoded Secret	Found Sensitive Keyword: Landroid/text/method...	M2: Insecure Data Storage	Use Secrets Manager or Android Keystore.

3. Hardcoded Secrets Found (Executive Summary)

Secret Type	Evidence (Match)	Severity	Remediation Guide
GCP API Key	https://www.googleapis.com/geolocation/v1/geolocate?channel=1&key;=AlzaSyDS08kVS5Q-2YSGRxrK2LHTeSApG4SNmU	High	Restrict API Key in GCP Console to specific IP/Package.

Secret Type	Evidence (Match)	Severity	Remediation Guide
Sensitive Keyword	()Landroidx/compose/foundation/text/PasswordInputTransformation;	Medium	Replace with Android Keystore or Encrypted Storage.
Sensitive Keyword	, isPassword=	Medium	Replace with Android Keystore or Encrypted Storage.
Sensitive Keyword	; password:	Medium	Replace with Android Keystore or Encrypted Storage.
Sensitive Keyword	Failed to fetch show password setting, using value: true	Medium	Replace with Android Keystore or Encrypted Storage.
Sensitive Keyword	Landroid/text/method/PasswordTransformationMethod;	Medium	Replace with Android Keystore or Encrypted Storage.
Sensitive Keyword	Landroidx/compose/foundation/text/PasswordInputTransformation;	Medium	Replace with Android Keystore or Encrypted Storage.
Sensitive Keyword	Landroidx/compose/foundation/text/SecureTextFieldController\$passwordInputTransformation\$1;	Medium	Replace with Android Keystore or Encrypted Storage.
Sensitive Keyword	Landroidx/compose/ui/text/input/PasswordVisualTransformation;	Medium	Replace with Android Keystore or Encrypted Storage.
Sensitive Keyword	NewPassword	Medium	Replace with Android Keystore or Encrypted Storage.
Sensitive Keyword	NumberPassword	Medium	Replace with Android Keystore or Encrypted Storage.
Sensitive Keyword	Password	Medium	Replace with Android Keystore or Encrypted Storage.
Sensitive Keyword	getNewPassword	Medium	Replace with Android Keystore or Encrypted Storage.
Sensitive Keyword	getNumberPassword-PjHm6EE\$annotations	Medium	Replace with Android Keystore or Encrypted Storage.
Sensitive Keyword	getPassword-PjHm6EE\$annotations	Medium	Replace with Android Keystore or Encrypted Storage.

[!] Note: Showing top 15 critical findings. Total 121 secrets detected in full scan.
