

ANDROID AUDITOR: SECURITY REPORT

Enterprise Grade Binary Forensics | 2026-10-08 11:40

Target Application: Panda Touch Pro
Package Name: com.panda.touch

1. Security Analysis Overview

RISK SCORE: 7
VERDICT: Suspicious
TOP FINDINGS: No high-risk permissions, Secrets=193, Exported=9.

2. Detailed Findings & Remediation Guide

Component / Vulnerability	Contextual Risk Analysis	OWASP Cat.	Remediation Guide
Permissions	Panda Touch Pro categorized as General. Permissions seem standard for this type.	Info	No immediate action.
Manifest: allowBackup	Set to true. Potential data leak via adb backup.	M2: Insecure Data Storage	Set allowBackup="false" in Manifest.
Hardcoded Secret	Found Sensitive Keyword: ; password:...	M2: Insecure Data Storage	Use Secrets Manager or Android Keystore.
Hardcoded Secret	Found Sensitive Keyword: CREATE_PASSWORD...	M2: Insecure Data Storage	Use Secrets Manager or Android Keystore.
Hardcoded Secret	Found Sensitive Keyword: CREATE_PASSWORD_TAG...	M2: Insecure Data Storage	Use Secrets Manager or Android Keystore.
Hardcoded Secret	Found Sensitive Keyword: Create Credential re...	M2: Insecure Data Storage	Use Secrets Manager or Android Keystore.
Hardcoded Secret	Found Sensitive Keyword: CreatePassword...	M2: Insecure Data Storage	Use Secrets Manager or Android Keystore.

3. Hardcoded Secrets Found (Executive Summary)

Secret Type	Evidence (Match)	Severity	Remediation Guide
Sensitive Keyword	; password:	Medium	Replace with Android Keystore or Encrypted Storage.
Sensitive Keyword	CREATE_PASSWORD	Medium	Replace with Android Keystore or Encrypted Storage.
Sensitive Keyword	CREATE_PASSWORD_TAG	Medium	Replace with Android Keystore or Encrypted Storage.
Sensitive Keyword	Create Credential request is unsupported, not password or publickeycredential	Medium	Replace with Android Keystore or Encrypted Storage.
Sensitive Keyword	CreatePassword	Medium	Replace with Android Keystore or Encrypted Storage.
Sensitive Keyword	Credential returned but no google Id or password or passkey found	Medium	Replace with Android Keystore or Encrypted Storage.
Sensitive Keyword	During save password, found UI intent sender failure:	Medium	Replace with Android Keystore or Encrypted Storage.
Sensitive Keyword	During save password, found password failure response from one tap	Medium	Replace with Android Keystore or Encrypted Storage.
Sensitive Keyword	During save password, params is null, nothing to launch for create password	Medium	Replace with Android Keystore or Encrypted Storage.
Sensitive Keyword	Landroidx/text/method/PasswordTransformation Method;	Medium	Replace with Android Keystore or Encrypted Storage.
Sensitive Keyword	Landroidx/credentials/playservices/HiddenActivity\$handleCreatePassword\$1\$1;	Medium	Replace with Android Keystore or Encrypted Storage.
Sensitive Keyword	Landroidx/credentials/playservices/controllers/CreatePassword/CredentialProviderCreatePasswordController\$Companion;	Medium	Replace with Android Keystore or Encrypted Storage.
Sensitive Keyword	Landroidx/credentials/playservices/controllers/CreatePassword/CredentialProviderCreatePasswordController\$handleResponse\$1;	Medium	Replace with Android Keystore or Encrypted Storage.
Sensitive Keyword	Landroidx/credentials/playservices/controllers/CreatePassword/CredentialProviderCreatePasswordController\$handleResponse\$2;	Medium	Replace with Android Keystore or Encrypted Storage.
Sensitive Keyword	Landroidx/credentials/playservices/controllers/CreatePassword/CredentialProviderCreatePasswordController\$handleResponse\$3;	Medium	Replace with Android Keystore or Encrypted Storage.

[!] Note: Showing top 15 critical findings. Total 193 secrets detected in full scan.
